For Immediate Release — September 30, 2021

Hazard Mitigation Public Information Meeting

As a result of the flooding that occurred with Tropical Storm Fred, Haywood County residents and property owners may be eligible for assistance under FEMA's Hazard Mitigation Grant Program.

Hazard mitigation is any sustainable action that reduces or eliminates long-term risk to people and property from future disasters. Mitigation efforts break the cycle of disaster damage, reconstruction, and repeated damage. Hazard mitigation includes long-term solutions that reduce the impact of disasters in the future.

For home and property owners, if you volunteer to participate in the Hazard Mitigation Grant program, assistance may be provided through any of the options listed below:

- Home & property acquisition (demolition or relocation)
- Home elevation
- Mitigation reconstruction
- Floodproofing

The public is invited to participate in a meeting where representatives of North Carolina Emergency Management will explain what programs are available locally and how to apply.

Hazard Mitigation Public Meeting

When: October 7, 2021, 6:30 p.m.

Where: Haywood Community College Auditorium

The purpose of this meeting is to inform the public of the available options under the Hazard Mitigation Grant Program. There is no obligation to apply and no obligation to participate if you do apply. Making an application for flood mitigation assistance simply indicates your interest in the available programs.

North Carolina Emergency Management representatives will be on hand after the meeting to answer questions about the application process and help you fill out application paperwork if you do wish to do so.
